

There's digital signage.

And then there's digital signage for you.

**The Power to Wow has Never Been Easier.**

Why present customers in your lobby or waiting room with static signage that's ignored and ineffective when – in just minutes – you can create a contemporary, professional-looking multi-media digital presentation that informs and sells even as it uplifts and entertains?

Power2Show is as easy to use as your MP3 player, pays for itself with its first presentation, and incorporates everything from PowerPoint to scrolling news headlines from live Websites such as [cnn.com](http://cnn.com). Digital Signage never looked better.
